SUMMARY

Senior Software Engineer with 9+ years of experience building high-traffic full-stack products in Node.js and TypeScript, with a track record of leading payment integrations, regulated-market launches, and platforms serving 100k+ concurrent users.

EXPERIENCE

Easygo — Senior Software Engineer

Mar 2023 – Present

Tech: Node.js, TypeScript, GraphQL, Fastify, Svelte, AWS, Datadog

- Led stake.com's launch into Denmark's regulated market: coordinated with stakeholders and external Danish legal advisors, and designed an architecture pattern enabling the existing codebase to support regulated markets.
- Led the integration of four new payment providers into stake.com — MoonPay, Swapped, Mesh, and Onramper.
- Kept stake.com stable through a sudden surge to 100,000+ concurrent users during IPL by monitoring pod CPU and memory usage in Datadog and scaling infrastructure to match.
- Diagnosed database bottlenecks with AWS Performance Insights and optimized slow queries, batching individual requests into bulk operations to sharply cut database round trips.
- Built the admin control panel for moon.com, a new product, from scratch in Svelte.
- Integrated the Google Maps API for KYC address verification on stake.com.
- Improved GraphQL performance on moon.com by 15% by migrating the server from Express to Fastify.

Ailo — Software Engineer

Sept 2021 – Mar 2023

Tech: Node.js, Nest.js, TypeScript, GraphQL, PostgreSQL, React.js

- Built APIs powering the Ailo property inspection app.
- Developed frontend and backend features for property-management workflows including Repairs & Maintenance, Lease Renewals, and New Tenancies.
- Integrated REI forms such as Entry Notice, with automatic prefill of tenancy data.

Clipboard Health — Senior Software Developer

Dec 2020 – Sept 2021

- Built a shift verification tool for validating worker shifts.
- Developed an in-house system for sending and receiving SMS and email.
- Created an internal tool for bulk shift creation.
- Integrated Stripe payment processing.

Gambit Sports — Software Development Engineer

June 2019 – Dec 2020

Worked on the Nostra Pro app.

- Increased debit card payment success rate from 62% to 90%.
- Built a dynamic payment gateway system routing traffic across Paytm, Cashfree, and PhonePe based on card type, bank, and gateway availability.
- Developed voucher code functionality with vendors including Flipkart, PhonePe, Dunzo, and Myntra.
- Created an affiliate system supporting spend, referral, and deposit commissions.
- Built an automatic payout withdrawal system with a fraud-check algorithm.
- Introduced SQS queues to improve performance and transaction reliability.

Simform Solutions — Full Stack Developer

June 2017 – June 2019

Tech: Node.js, Express.js, Sails.js, MongoDB, MySQL, PostgreSQL

- Built an AWS Lambda function that syncs DynamoDB data into Elasticsearch, published as an npm module.
- Built payment APIs with Stripe integration using Node.js.
- Developed APIs for a cab-hailing app using Sails.js.
- Developed APIs for an Instagram-style photo-sharing app using Node.js and MongoDB.

SKILLS

Languages: JavaScript, TypeScript, Go, SQL, HTML, CSS

Frameworks/Libraries: Node.js, Nest.js, Express.js, React.js, Svelte, GraphQL, Sails.js

Databases: PostgreSQL, MySQL, MongoDB

Cloud & Tools: AWS, Docker

PROJECTS

DynamoDB-to-Elasticsearch [Node.js, AWS]

An npm module that dumps DynamoDB data into AWS Elasticsearch indices — filling a gap where no AWS Lambda blueprint existed.
<https://www.npmjs.com/package/dynamodb-to-elasticsearch>

Redis Process Lock [Node.js, Redis]

An npm module providing process/resource locking backed by Redis, for cases single-threaded JavaScript can't handle alone.
<https://www.npmjs.com/package/redis-process-lock>

Leap Drop [Leap Motion, Android, Chrome Extension, Socket.io]

A hack that lets you drag a webpage off one computer and drop it onto another, where it opens almost instantly.
<https://thegeekbros.github.io/leapdrop/>

EDUCATION

Babaria Institute of Technology, Varnama, Vadodara

B.E. Computer Science and Engineering 2017
CGPA: 8.61

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (Aug 2020 – Aug 2023)

Credentials: <https://www.youracclaim.com/badges/81dd30c3-0389-4052-b842-cc379934ed4f>

ACHIEVEMENTS

1st prize, Clipboard Health Hackathon.

1st prize, Hardware category (by hackster.io) at InOut 3.0, for Leap Drop.
